

# KYRYCHENKO OLEH

## Full-Stack Engineer & Business Analyst

**AI-assisted Engineering** **Process Optimization**

Full-Stack Engineer with **3 years of IT experience**, combining scalable software engineering (React, Next.js, Node.js, PostgreSQL) with business analysis and process optimization. Experienced in architecting robust full-stack applications, writing maintainable code, and optimizing web performance, while leveraging Lean, TOC (Theory of Constraints), and Toyota Way principles to eliminate technical and operational bottlenecks. An avid reader of **80+ books** on personal growth, self-development, business strategy, and systems thinking (*The Goal, The Toyota Way*), bringing a high-performance, disciplined engineering mindset to product delivery.

## Contact

+(380) 66 149 7301

kiricenkoo182@gmail.com

Poltava, Ukraine | Remote

https://olehkyrych.xyz

## Skills

### Frontend
- Next.js, React, Redux
- TypeScript, JavaScript
- Tailwind CSS, SCSS/SASS

### Backend
- Node.js, Express
- PostgreSQL
- REST APIs, WebSockets

### Tools
- Zod, Git, Webpack
- Docker, Postman AI-assisted
- Engineering(Cursor, Claude etc)

## Business & Soft Skills

- Business Process Analysis
- Bottleneck Elimination (TOC)
- Lean & Workflow Optimization
- Product & System Thinking
- Ownership & Accountability

## Languages

- **Ukrainian** — Native
- **English** — B2

## Work Experience

### Full-Stack Developer & Business Analyst
**01.2026 - 11.2026**

**Bypass**

- Engineered end-to-end full-stack web solutions using Next.js, React, TypeScript, Node.js, and PostgreSQL
- **Process & Cost Optimization:** Identified operational bottlenecks and re-engineered internal workflows, introducing optimizations that allowed the company to reduce department headcount by 4x while boosting overall execution speed and saving significant resources.
- **Strategic Alignment:** Bridged the gap between business stakeholders and engineering execution, translating complex technical decisions into measurable business efficiency and reduced operational overhead.

### Founder & Lead Engineer
**09.2026 – Present**

**Tech Startup — SyntaxAI (Own Project)**

- Founded and developed an AI-powered browser extension for Chrome & Firefox that analyzes page context, code snippets, and pasted text. Features auto-detection of tech stacks, AI-generated explanations, IT note-taking, interactive UI, and code analytics.

## Key Projects & Freelance

### K.I.RICH sewing studio WebSite
[ Next.js • React • TS • Node.js • Tailwind • PostgreSQL ]

Delivered an end-to-end business solution (design, frontend, backend, and marketing). Built the product catalog and order management system, optimized the custom measurement intake workflow, and implemented tailored logic for bespoke garments and individual client requests.

### FLOW CRM
[ React • SCSS • TS • Python ]

Full-featured CRM platform featuring interactive Kanban workflow boards, structured client databases, real-time analytics & performance statistics, and automated task tracking.

### Phone Catalog
[ React • SCSS • TS • Node.js ]

Full-featured Apple hardware e-commerce store with dynamic model filtering, specs comparison, responsive product catalog, interactive cart management, and seamless UI design.

## Education

### Poltava Polytechnic Faculty College
**2024 - Present**

Computer-Aided Design of Power SupplySystems

### Mate Academy
**2025**

Full-Stack Developer

### ItStep Academy
**2024**

Python | JS
